ROBOTIC PROCESS AUTOMATION

Reduce the costs of simple and repetitive tasks with robots.

Free up your resources.

In this fast-paced, ever-changing world, we are too often occupied with tasks which do not bring added value to the business. **Robotic process automation** (RPA) is not related in any way to physical robots. The technology does, on the other hand, have everything to do with **automating manual, rule-based, and other repetitive business activities.**

Increase operational efficiency, reduce costs, increase quality, accuracy, and compliance.

RPA helps companies with business process technology, controlled by structured inputs and business logic, to automate straightforward, repetitive, and rule-based tasks that are usually done by humans. Bots can imitate actions that people carry out through applications, so **employees can focus on more value-added tasks.**

Increase efficiency

Bots can interact with application user interfaces in the same way as humans. By imitating people's actions on computers, Bots can work faster than humans, 24 hours a day.

Increase accuracy

Bots, when configured properly, do not have bad days and don't make mistakes. As a result, Bots not only execute transactions faster, but also with a higher degree of accuracy.

Increase compliance

RPA's capability helps eliminate or reduce the time-consuming processes of collecting, compiling, and summarising large amounts of information.

Minimise costs

RPA enables enterprises to reduce average handling times for business processes and processing costs by maximising employee productivity.

RPA Automation Areas

Finance

- Process-to-pay
- Order-to-cash
- Record-to-report

Supply Chain

- Inventory management
- Demand & supply
- Planning
- Invoice & contract
- management

IT

- Server & app monitoring
- Routine maintenance & monitoring

HR

- Payroll automation
- Absence Management
- Onboarding & offboarding
- Benefits administration

Customer Services

- Address change
- Password reset
- Payments
- Scheduling appointments
- Order modifications

Sales

- Sales Order Processing
- Customer Data Maintenance
- Customer Due Diligience
